- **Coursework:** Computer Science, Artificial Intelligence & Machine Learning, Full Stack Web Development

Pregrad Campus, MERN Stack Developer Aug 2024 - Oct 2024

- Certified MERN Stack Developer
- **Coursework:** MERN Stack Development, React.js, MongoDB, Express.js, Node.js

Experience

Tic Tech Toe '24, 2nd Runners up | [Link here](#) Sept 2024

- We participated in TIC TECH TOE conducted by DAIICT in September 2024. Our team secured 3rd position for the same.
- We created an AI powered gifting chat-bot that suggests/ recommends gifts for your friends, family, relatives, loved ones, etc. according to the requirement and the given budget by the user.
- It was made with the help of ReactJS, TailwindCSS, Daisy-UI, Chakra-UI, Flask, and Gemini-API.

Co-founder & Software Engineer, Self Web Agency Feb 2025 – Present

- Co-founded a full-fledged web agency with a friend; currently operating as an unlisted startup, with plans to officially register the company by June-July 2025.
- We specialize in building production-ready, fully functional websites tailored to client requirements, no matter how specific or unique.
- Collaboratively handle end-to-end development, from user interface/UI design to back-end integration, ensuring quality and performance at every stage.
- We have already shipped our first project that was Muzik Skill House, a personalized learning management system. The link to the same is given here. | [Link here](#)

Participated in multiple hackathons, received the certificate for participation

- Datathrone 2.0 - March 2024
- AVStion - Dec 2024
- DotSlash 8.0 - Feb 2025
- Ingenium hackathon - March 2025
- Tic Tech Toe '25 - April 2025
- Hackspire - April 2025

Projects

Portfolio Website

Portfolio Link

- Fully responsive personal portfolio built using Next.js, Tailwind CSS, and Framer Motion
- Showcases all projects, contact details, and skills with clean UI and smooth animations
- Designed to reflect personal branding and adapt seamlessly across devices

Zentry Clone – Xenith.com

Xenith.com (Github)

- A frontend clone of Zentry, made using React, GSAP, Tailwind CSS, and Framer Motion
- Pixel-perfect animations with no backend logic, purely focused on frontend mastery
- Built to demonstrate modern animations, smooth transitions, and visual excellence

Storix – Drive Clone

Storix (Github)

- Cloud storage web app inspired by Google Drive, using Next.js, TypeScript, Appwrite, and Tailwind CSS
- Features file uploads, folders, and storage interface with modern UX via ShadCN UI
- Built as a self-initiated project to simulate real-world file management apps

SaaS Product – Muzik Skill House (LMS)

Muzik Skill House

- First SaaS product built under our web agency for music-based online learning
- Built with MERN stack + TypeScript, ShadCN UI, and Tailwind CSS for scalability
- Enables content upload, student management, and end-to-end LMS functionality for the client
