Education

Adani University **July 2023 – Present**
B-Tech in Computer Science and Technology (AI-ML) - ***CGPA: 8.00*** *Ahmedabad, Gujarat*

Experience

Adani University | *Research Intern* **Jun 2026 - Aug 2026**

- Designed a speech preprocessing and SpecAugment pipeline using Python and Librosa, standardizing 16 kHz audio and expanding low-resource data 4× (241 to 964 samples).
- Benchmarked 4 deep learning and transformer models (CRNN, Multi-Modal CRNN, Wav2Vec2) in PyTorch and Keras using Accuracy, Precision, Recall, and F1-score.
- Enforced speaker-disjoint validation and integrated prosodic features, achieving a 48% Macro F1-score boost and 100% recall on unseen dialect speech.

Auraverse | *SWE Intern* **Mar 2026 – Jun 2026**

- Led the frontend architecture and development of **Presio CRM**, delivering a scalable and production-ready user interface.
- Developed **10+ authentication and user management REST APIs** in Go, including login, registration, JWT authentication, and role-based access control.
- Built **GitHub Actions CI workflows** for automated testing and code quality checks, assisted Cloudflare production deployments.

Techyez | *Tech Intern* **Nov 2025 – Jan 2026**

- Developed an interactive **Variable Tracing Visualizer** in Next.js supporting **100+ JavaScript execution scenarios**.
- Designed reusable visualization components to explain scope, hoisting, closures, and execution flow through real-time code tracing.

Projects

Seasyn | *Go, Fiber v2, PostgreSQL, MongoDB, MySQL, SQLite, Render, Vercel, CI/CD* *August 2026*

- Built a **database migration engine** in Go (Fiber) with zero-OOM streaming across 4 databases and live telemetry.
- Engineered **Auto-DDL schema synthesis**, **AES-256-GCM** credential encryption, and multi-tenant RBAC.
- Automated **monorepo CI/CD pipelines** deploying services to **Render** and **Vercel** via GitHub Actions.
- Managed project delivery and designed **OpenAPI contracts** for frontend telemetry integration.
- **Links:** Visit Site | GitHub

Bloom | *Bun, TypeScript, OpenTUI, Hono, Next.js, PostgreSQL, Prisma, Vercel AI SDK* *Jun 2026*

- Built a **terminal-first AI coding agent** supporting **Build** and **Plan** modes with secure local tool execution.
- Designed a **monorepo** using Bun, Hono, Next.js, Prisma, and PostgreSQL for the CLI, API, web app, and shared modules.
- Integrated **6 LLMs** across Google and Groq, browser-based authentication, and automated CLI releases using GitHub Actions.
- **Links:** Visit Site

Draft.IO | *Next.js, Node.js, Express, PostgreSQL, MongoDB, Redis, OpenAI API* *Jan 2026*

- Built an **AI-powered blogging platform** with a **scalable microservices architecture** and **RESTful APIs** backed by PostgreSQL, MongoDB, and Redis for caching and low-latency reads.
- Integrated **AI writing tools** for content generation, SEO, and summarization.
- Implemented **real-time chat and notifications** using WebSockets, designed to handle concurrent user sessions reliably.
- Designed a **personalized recommendation system** based on user behavior and engagement data.
- **Links:** GitHub Repository

Skills

Languages: JavaScript, TypeScript, Go, Python, Java, SQL
Backend & Databases: Node.js, Express.js, Hono, REST APIs, gRPC, FastAPI, Microservices, Prisma, Drizzle, PostgreSQL, MongoDB, Redis, Turborepo
Frontend: Next.js, React, Tailwind CSS, shadcn/ui, HTML, CSS, GSAP, Framer Motion, OpenTUI
AI/ML: LLMs, Vercel AI SDK, Hugging Face, Transformers, Neural Networks, Fine Tuning, Ollama,
Tools & Cloud: Git, GitHub, GitHub Actions, Docker, Postman, Cloudflare, Vercel, Render, AWS, GCP, Figma

Certifications & Achievements

- 3D Computer Vision Summer School | BITS Goa *June 2026* Credentials
- AWS Academy Graduate - Cloud Architecting *April 2026* Credentials
- AI Fluency - Framework and Foundations | Anthropic *June 2026* Credentials
- Top 40 – DotSlash 8.0 | SVNIT *Feb 2025* Credentials
- MERN Stack Developer | Pregrad Campus *Nov 2024* Credentials
- 2nd Runner-Up – TIC TECH TOE'24 | DAIICT *Sept 2024* Credentials
